

FOTB-16

STL Fiber Optic Termination Box (FOTB-16) is used for splitting/termination of fibers in locations like multi dwelling units and small offices, where the port counts are low to moderate. Separate access with individual lock and key doors are provided for cable termination and splice (input) areas to restrict customer access. The box is made from high quality plastic. This is a perfect cost-effective solution in the FTTx networks for both indoor and outdoor environments.
