

STERLITE TECHNOLOGIES LIMITED

Conflict Free Sourcing Policy

Sterlite Technologies Limited (STL) is committed to operate its business in an ethical, lawful and environmentally responsible manner and even covers its suppliers. It aims at ensuring this through adherence to human rights, Corporate Social Responsibility and other such aspects that form an integral part to creating shared value and ensuring a greener and socially conscious supply chain.

Conflict minerals refer to the mineral precursors of the metals tantalum, tin, tungsten, and gold (3TG), which are found in small amounts in virtually all electronic products. Revenue from mining these minerals in the Democratic Republic of Congo (DRC) and nine neighbouring countries has been linked to funding for groups engaged in extreme violence and human rights atrocities.

As a part of STL's commitment to corporate responsibility & respecting human rights in our own operations and in our global supply chain, it is STL's goal to not to use tantalum, tin, tungsten & gold in our product that do not directly or indirectly finance or benefit armed groups in the DRC or adjoining countries while continuing to support responsible mineral sourcing in the region. STL expects our suppliers to have in place policies and due diligence measures that will enable us to reasonably assure that products and components supplied to us containing conflict minerals are DRC conflict free.

The content and robustness of implementation of this policy will be reviewed periodically and revised accordingly, and includes sharing best practices throughout the location.

We will also measure progress against the policy and review performance on a periodic basis to ensure ongoing sustainability management of suppliers.
